TO WHOMSOEVER IT MAY CONCERN

It gives me great pleasure to write this letter of reference for XXX (Student Name). Mr Patel came to this institute with a good academic record. I taught him in M.Sc.-industrial Chemistry course during 2013-2015. Through my observation, I would like to say that he was attentive, studious and articulate. He always had a positive attitude towards study.

My interactions with Mr Patel provide me with sufficient information to measure and examine the intellectual capability and analytical skills that he had developed during his course. He was hard-working, diligent and sincere in his efforts and his practical approach for handling the problems was noteworthy. One can find a commitment expected from students, in his.

He had a friendly attitude and was always ready to help his friends at the time of difficulties. He was always attentive to whatever had been taught in the class. He was always well prepared with his coursework. His assignments had been neat and precise.

He had also shown interest in learning things apart from the classroom hours. In addition, He had attended various activities whenever he got a chance.

I strongly recommend his candidature for any suitable course. I wish him grand success in all his future endeavors.
