

## STATEMENT OF PURPOSE

My family have always pushed me to the limits and made me get out of my comfort zone leading to where I am at present and making me confident and brave enough to face and mitigate any challenge in this competitive environment. I finished my secondary education from Gujarat Secondary and Higher Secondary Education board in 2010 and Higher Secondary Education from the same board in 2012. Considering my interest, inclination towards medical field and being an inquisitive personality, I opted for Bachelor of Physiotherapy from Sardar Patel University and completed in 2017. Right now I am pursuing MSc Healthcare Leadership from BPP University, UK. It is here that I gained both theoretical and practical knowledge that indeed catered my inquisitive attitude. I have always been active in extracurricular activities such as taking part in inter/intra college festivals and sports events. Also to upgrade my knowledge and skills in physiotherapy; I have attended various workshops.

In this time of innovative insurgencies, UK has been at the cutting edge of spearheading work in the advancement of innovation with the business and I plan to get advantage from this extraordinary undertaking. India's colleges give courses which concentrate on just a single instructive field and focus just single real subject and also its training framework emphasis on conventional hypothetical perspectives rather than updated procedures. Additionally UK is known for its high ability of instruction, social differing qualities and cordial locals. Aside from this, the way of life and nature of living in UK is among the best on the planet. Considering many reasons I made my brain to examine in UK which is the place that is known for chances to investigate my insight and region at worldwide level.

Deciding to choose a university in UK, I had no doubts about Coventry University as my higher education destination. Coventry University is one of youngest university, educating about many students with campuses and

educational centres spread across various cities. Coventry University prepares students to compete in this increasingly digital world through online and mobile technologies along with classroom teaching. The huge campus facilitates various services like accommodation, library, book store, transportation, parking and counseling centre. Coventry University emphasis on extra-curricular activities and research leads to holistic growth and learning of the students. I believe graduating from Coventry University will definitely add value to my existing set of knowledge and make me ready for my career.

Global Business MBA with a year in Industry is the program that I have selected ahead for my second masters. I have referred modules which are strategic management, marketing in a global age, project management, managing international trade, Global HRM strategy. I am intending to do the course which will lead me to an international level and will raise chances of employment and I will gain a high paid job. It will enhance my skills and practical knowledge with international exposure and build up my future plan.

This course will very useful and will also help me to set my career back in my home country. After that, I will return back to my home country and use my knowledge, training, experience that I have learned to bring at least a small change and serve my country. I have done my graduation in physiotherapy therefore I'll also be having to open up my own little clinic.

**Sincerely,**
