I have done my schooling in St Ann's High school with First Division and done my Intermediate (CEC) in Morning Star junior college, Guntur with 68.9%. I have completed my B.Com (Commerce) with First Class from Sri Krishnadevaraya University India. After graduation I worked as Trainee Manager and explored skills accordingly. But, I always have a dream about running a business on my own, so that I quit my job and look for opted course in order to start my business. I found that I am lack in financials issues and some managerial skills. Then I decided to pursue Masters in Business Administration finance with a year industry as specialization to refine my knowledge and skills in competitive world. I seriously believe that my Masters in Business Administration Finance would fulfil my goal.

By pursuing these management skills from your university will always allow me to achieve this goal. I was inspired to pursue a career in management from a young age, witnessing the business activities of my father. He is an entrepreneur, who is very business-minded and dedicated to his work. From my childhood I began to study many ideas and concepts related to business and management. As a book lover I often read books and magazines such related to business and it was clear even at that young age that I would work in business in the future. My decision to pursue a master's degree in Master of Business Administration with a year in Industry is due to the fact that I recognize that my uncle is limited by his qualifications because of lack of skills so I decided to be able to assist him and his company in the near future.

UK is a most popular study destination and has a strong international reputation for higher education. Known as 3rd best place to study and live after USA and Canada. Education in UK has got global recognition, adaptable climatic conditions, affordable when compared to Canada and USA. By observing recent deportation issues and black listed universities in USA, I was not able to judge which university is best and recognized. During my research I have found that for USA where in the tuition fee and cost of living is very high because of high exchange value of US Dollar. UK climatic conditions are somewhat similar to India whereas Canada's climate is too cold, beaver infested, and full of maples and snow. UK is the safest country for the students with low crime rate.

The main reason chosen by university is having a strong focus on the employability of graduates and students are provided with the knowledge, practical skills and experience that employers always look for, giving them the best career chances. Student support team in the university will provides students and graduates with magnificent support and advice to help turn their business and give not-for-profit ideas into established and become a successful journey. The University is the UK's leading business-facing university and provides excellent teaching facilities. It is like innovative and enterprising individuals and organizations to a complete excel. We can use modern, industry-standard software wherever possible. After evaluating all these factors I have chosen York St. John University for my Masters because the course I prefer is rarely offered in India and also multi culture environment will help me to grab the opportunities worldwide

MBA finance with a year industry is to help me build a muscular understanding of the way organizations operate globally and also help me develop the skills for a hugely rewarding career. I can now combine this internationally focuses Master of Business Administration with a year in Industry. Expanding our own business from my home country and will have

#

#

effect of increasing the visibility. Therefore, I can enjoy a reputation boost from international growth, and our new clients in the target location may perceive our business as having tropical level. I will also have a great opportunity to extend the reach of our intellectual property, trademarks and copyrights to new regions.

As I develop our knowledge of business in an international level, I could gain easily gain the attributes to contribute to the global business strategies of particular organizations and help to resolve the International business problems. Gain advanced knowledge of organizations together with the theory of international business and apply if to solve real business problems through our employability practice approach to teaching and learning.

After completion of a Master's degree from UK I had a beautiful experience in my life. It will helpful to improve my language skills much better so that, I will have better scope to build my career effectively. This will make me to be equipped with the updated knowledge and skills. This program would give the knowledge and ability to work as financial and Business professional. After studies I will come back to India I would like join as a Financial Manager, in top multinational companies. After getting handful experience will start my own business with the help of my family and I will implement my skills and settle my career in pinnacle position.
